SUMMARY

Software Developer with 2+ years of experience building backend applications, REST APIs, and cloud-ready architectures using Python and C#. Proficient in PostgreSQL, Docker, and database management in cloud environments.

EXPERIENCE

Product App Developer Associate · Accenture — Oct 2024 – Sep 2026

- Supported enterprise application and IAM workflows, including user access provisioning, modification, and de-provisioning for 20+ weekly requests.
- Performed SQL-based data validation, troubleshooting, and integrity checks, improving access-review accuracy by 20%.
- Onboarded an application to a pre-production environment by executing and validating 5 API calls using Postman.
- Maintained 98% SLA compliance across user lifecycle requests and prepared audit- ready Critical Access Review (CAR) documentation.
- Authored 5 SOPs and knowledge-base articles adopted across the team.

Database Administrator & Manual Tester · Bharat Electronics Limited — Dec 2023 – Oct 2024

- Executed targeted SQL queries to remove 100 redundant user records and supported end-users with website profile creation.
- Validated website profile data synchronization against backend databases across 30+ user journeys to ensure data integrity.
- Executed 20+ periodic database refreshes to support ongoing maintenance and ensure seamless application operations.
- Identified and verified 10 database record discrepancies by cross-checking user profile information between the website and SQL database.
- Executed routine SQL queries for database maintenance across ~500 user records and ensured accurate data management in application records.

Full-Stack Developer Intern · Varcons Technologies — Oct 2022 – Nov 2022

- Built a full-stack Grocery Store web application using HTML, CSS, JavaScript, Node.js, and Express, implementing 5 core features for product catalog, user accounts, and order management.
- Developed ~4 core application features including product management, user accounts, and order processing using full-stack technologies.
- Integrated frontend and backend components using 5 REST APIs to streamline user interactions and application functionality.

EDUCATION

MBA, Business Analytics — Oct 2024 – Oct 2026
Jain's College · GPA: 7.8/10

B.E., Information Science & Engineering — Aug 2019 – Aug 2023
NMIT College · GPA: 7.43/10

PROJECTS

TaskFlow
Developing a Django-based task management application with structured views, templates, and backend workflows.

Tech: Python, Django, PostgreSQL, Unit Testing

- Built and tested view logic in Django with safeguards against destructive GET requests, ensuring 21 view tests passed successfully.
- Built a TaskFlow web application using Python, Django, and PostgreSQL to streamline project tracking and task organization for users.
- Built CRUD operations, task status management, priority levels, and deadline tracking using Python and Django.
- Developed and executed automated test cases using Django's testing framework to validate forms, views, CRUD operations, user permissions, and input validation; successfully passed 27 tests.

LogLens
Built a log analysis backend with APIs to upload log files, parse entries, list uploaded files, retrieve parsed entries, and delete files.
Tech: Python, Flask, PostgreSQL, SQLAlchemy, Unit Testing

- Built PostgreSQL storage for parsed log entries using SQLAlchemy, integrating input validation and error handling; verified functionality across 15+ automated tests and API requests.
- Built REST APIs using Flask and SQLAlchemy for file uploads, log parsing, file retrieval, and record deletion.
- Integrated PostgreSQL using SQLAlchemy to store log file metadata and parsed log entries, ensuring reliable data persistence.

ShopStack
Architected a decoupled product catalog and cart application featuring separate FastAPI microservices and containerized PostgreSQL storage.
Tech: Python, FastAPI, PostgreSQL, Docker, React, Unit Testing

- Implemented 5 REST endpoints for product retrieval, cart operations, and stock reduction, and containerized decoupled services using Docker Compose.
- Architected a modular microservices-pattern Cart Service using FastAPI and integrated it with the Product Service via REST HTTP requests.
- Built product catalog backend using FastAPI and PostgreSQL to manage item information and inventory efficiently in a modular architecture.
- Developed and executed automated test cases using Pytest to validate API endpoints and database CRUD operations, achieving 100% test pass rate across 4 test cases.

Hotel Management Database
A relational database system managing rooms, room types, customers, and bookings, built with complex SQL queries utilizing JOINs, aggregations, and NULL handling.
Tech: SQL, SQL Server

- Built complex SQL queries using multiple JOINs, aggregations, DATEDIFF, and CASE statements to extract booking metrics and insights.

SKILLS

Technical: Python, C#, JavaScript, SQL, PostgreSQL, SQL Server, Django, Flask, FastAPI, ASP.NET Core, React, REST APIs

Tools: Docker, Git, Postman, ServiceNow

Soft Skills: OOP, ORM, Database Design, API Testing, Unit Testing, Agile/Scrum, SDLC, Manual Testing

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900) · Microsoft — Oct 2026
learn.microsoft.com/api/credentials/share/en-us/VishwanathanMrudula-2328/7A8F8CF1ADF020DA?sharingId=CF09D7B0EB0038F3

Foundation C# · Microsoft & freeCodeCamp — Oct 2025

Stream Training · Accenture — Oct 2024

Introduction to HTML5 & Python · Coursera — 2020

ACHIEVEMENTS

Heart Disease Detection using ANNs · Grenze Scientific Society — 2023
